

Data Model & Schema Reference

LumiNex — All collections, fields, types, enums, and relationships

1. Collections Overview

Collection	Demo Records	Primary Key	Relationships
users	9	id (string, 5-digit)	1:N service-requests, payments, notifications
categories	4	id (string)	1:N services
services	10	id (string / nanoid)	N:1 categories 1:N service-requests
service-requests	5	id (string / nanoid)	N:1 users (client) N:1 users (employee) N:1 services
payments	7	id (string / nanoid)	N:1 users (clientId)
subscriptions	3	id (string)	Referenced by users.plan
notifications	1	id (string)	N:1 users

2. Enum Definitions

All enums are enforced by TypeScript interfaces in `core/models/`. These values are used as string literals throughout the application.

UserRole	ADMIN		CLIENT		EMPLOYEE	
ServiceRequestStatus	PENDING	ASSIGNED	IN_PROGRESS	REVIEW	COMPLETED	REJECTED
Priority	LOW	NORMAL		HIGH	URGENT	
PriceType	FIXED	MONTHLY		YEARLY	CUSTOM	
PaymentStatus	PAID		PENDING		FAILED	
PaymentMethod	bKash	Nagad	Rocket	Bank Transfer	Cash	Card (future)
BusinessType	HEALTHCARE	RETAIL	TECHNOLOGY	EDUCATION	FINANCE	OTHER
NotificationType	STATUS_UPDATE		PAYMENT		ASSIGNMENT	SYSTEM
RequestStatus (flow)	PENDING → ASSIGNED → IN_PROGRESS → REVIEW → COMPLETED				(or) REJECTED at any stage	

3. Schema: users

Field	Type	Required	Applies To	Notes
id	string	Yes	All	Auto-generated 5-digit number or nanoid
name	string	Yes	All	Full display name
email	string	Yes	All	Unique across platform; used as login credential
password	string	Yes	All	Plain text in dev; must be hashed (bcrypt) in production
role	UserRole	Yes	All	ADMIN CLIENT EMPLOYEE — controls all access
phone	string	No	CLIENT, ADMIN	Stored with country code (e.g. +880 01234567890)
companyName	string	No	CLIENT	Business name; shown in admin client-management
businessType	string	No	CLIENT	HEALTHCARE RETAIL TECHNOLOGY EDUCATION FINANCE OTHER
country	string	No	CLIENT	Registration country (e.g. Bangladesh, Saudi Arabia)
division	string	No	CLIENT (Bangladesh)	BD administrative division (Dhaka, Chittagong, etc.)
district	string	No	CLIENT (Bangladesh)	BD district
thana	string	No	CLIENT (Bangladesh)	BD thana / upazila
village	string	No	CLIENT (Bangladesh)	Village or area name
address	string	No	All	Formatted full address for display
plan	string	No	CLIENT	STARTER GROWTH ENTERPRISE (references subscriptions)
designation	string	No	EMPLOYEE	Job title (e.g. Full Stack Developer, AI Developer)

Field	Type	Required	Applies To	Notes
avatar	string	No	All	Profile image URL (future — not yet implemented)
tenantId	string	No	All	For multi-tenant SaaS (proposed — Phase 6)

4. Schema: services

Field	Type	Required	Notes
id	string	Yes	Unique service identifier (s101, s102, or nanoid)
categoryId	string	Yes	Foreign key categories.id
categoryName	string	Yes	Denormalized for fast display without join
name	string	Yes	Service display name shown in catalogue
description	string	Yes	Short 1-2 sentence description
price	number	Yes	Base price in local currency (BDT default)
currency	string	No	BDT USD SAR — defaults to BDT
priceType	PriceType	Yes	FIXED MONTHLY YEARLY CUSTOM
deliveryDays	string	Yes	SLA estimate: '14' (days) or 'Ongoing' for monthly
isActive	boolean	Yes	true = visible in client catalogue; false = hidden
requiredDocuments	RequiredDocument[]	No	Array of docs client must upload with request
image	string	No	(Proposed) Cover image URL for service card
tags	string[]	No	(Proposed) Search/filter tags

RequiredDocument (nested in services)

Field	Type	Required	Notes
id	string	Yes	Unique document identifier
docName	string	Yes	Name of document (e.g. 'Trade License', 'NID Copy')
isMandatory	boolean	Yes	true = client must upload before request accepted
description	string	Yes	Instructions for what to provide

5. Schema: service-requests

Field	Type	Required	Notes
id	string	Yes	nanoid generated on creation
userId	string	Yes	FK users.id (the client who submitted)
serviceId	string	Yes	FK services.id
serviceName	string	Yes	Denormalized service name for display
categoryName	string	Yes	Denormalized category name
status	RequestStatus	Yes	PENDING ASSIGNED IN_PROGRESS REVIEW COMPLETED REJECTED
priority	Priority	Yes	LOW NORMAL HIGH URGENT — set by client or admin
assignedTo	string	No	FK users.id (employee assigned by admin)
progress	number	No	0 to 100 — percentage updated by employee
clientNotes	string	No	Instructions or context provided by client on submission
employeeNotes	string	No	Update notes added by assigned employee
createdAt	ISO string	Yes	UTC timestamp of submission (e.g. 2026-05-10T09:15:32.082Z)
updatedAt	ISO string	No	Timestamp of most recent status or progress update
completedAt	ISO string	No	Set when status transitions to COMPLETED
attachments	string[]	No	(Proposed) Array of uploaded file URLs from client
deliverables	string[]	No	(Proposed) Array of file URLs uploaded by employee on completion
tenantId	string	No	(Proposed) For multi-tenant support — filters by agency

6. Schema: payments

Field	Type	Required	Notes
id	string	Yes	nanoid — unique payment record ID
clientId	string	Yes	FK users.id (payer)
client	string	Yes	Denormalized client name for display in admin table
item	string	Yes	Name of service or plan being paid for
amount	number	Yes	Payment amount in local currency (BDT)
method	PaymentMethod	Yes	bKash Nagad Rocket Bank Transfer Cash
status	PaymentStatus	Yes	PAID PENDING FAILED
date	string	Yes	Date in YYYY-MM-DD format
invoiceUrl	string	No	(Proposed) Generated PDF invoice download link
txnId	string	No	(Proposed) Transaction ID from payment gateway (SSLCommerz)
requestId	string	No	(Proposed) FK service-requests.id (links payment to project)

7. Schema: subscriptions

Field	Type	Required	Notes
id	string	Yes	Unique plan ID
name	string	Yes	Plan display name (e.g. Digital Foundation)
price	number	Yes	Monthly price in USD
features	string[]	Yes	Array of included feature strings shown on plan card
recommended	boolean	Yes	true = shown with 'Most Popular' badge on pricing page

Field	Type	Required	Notes
currency	string	No	(Proposed) BDT USD — for multi-currency display
maxRequests	number	No	(Proposed) Monthly request limit per plan tier
color	string	No	(Proposed) Accent color for plan card on pricing page

8. Proposed New Collections

theme-settings (singleton collection — always 1 record)

Field	Type	Description
id	string	Always '1' — singleton record loaded on every app init
primaryColor	string	Hex color for all primary buttons, headers, badges (e.g. #4F46E5)
accentColor	string	Secondary brand color for highlights and hover states
logoUrl	string	URL of uploaded company logo — shown in navbar and login screen
fontFamily	string	Google Font name (e.g. 'Poppins', 'Inter', 'Roboto')
brandName	string	Company display name shown in navbar instead of LumiNex
darkMode	boolean	Default theme mode: true = dark, false = light
faviconUrl	string	Browser tab favicon URL (optional)

invoices (new collection)

Field	Type	Description
id	string	nanoid
paymentId	string	FK payments.id
clientId	string	FK users.id
issueDate	string	Date invoice was generated (YYYY-MM-DD)
dueDate	string	Payment due date (YYYY-MM-DD)
items	array	Line items: [{name: string, qty: number, unitPrice: number, total: number}]
subtotal	number	Sum before tax
tax	number	Tax amount (e.g. 15% VAT)
total	number	Final payable amount
pdfUrl	string	Link to generated PDF file on Cloudinary/S3
status	string	DRAFT SENT PAID

chat-messages (new collection)

Field	Type	Description
id	string	nanoid
requestId	string	FK service-requests.id — each request has its own chat thread
senderId	string	FK users.id
senderRole	string	CLIENT EMPLOYEE ADMIN
message	string	Text content of the message
attachmentUrl	string	Optional file URL attached to the message
createdAt	string	ISO timestamp
isRead	boolean	true when recipient has seen the message (drives unread count)

site-content (keyed records for admin-editable landing page)

Field	Type	Description
id	string	Section key: 'hero' 'about' 'contact' 'footer'
heroTitle	string	Main headline on the home page (e.g. 'Grow Your Business Online')
heroSubtitle	string	Sub-headline supporting text
heroImage	string	Background or feature image URL for hero section
heroCtaText	string	Call-to-action button label (e.g. 'Get Started')
aboutTitle	string	About section heading
aboutText	string	About section body paragraph
contactEmail	string	Contact section display email
contactPhone	string	Contact section display phone
socialLinks	object	{facebook, linkedin, twitter, instagram} — URLs for footer icons

9. Entity Relationship Diagram (Text)

The following shows all relationships between collections, including both current and proposed (marked with *).

From	Cardinality	To	Via Field	Status
users	1 : N	service-requests	userId	Existing
users	1 : N	service-requests	assignedTo	Existing
users	1 : N	payments	clientId	Existing
users	1 : N	notifications	userId	Existing
users.plan	N : 1	subscriptions	plan = name	Existing
categories	1 : N	services	categoryId	Existing
services	1 : N	service-requests	serviceId	Existing
payments	1 : 1	invoices	paymentId	Proposed *
service-requests	1 : N	chat-messages	requestId	Proposed *
users	1 : N	chat-messages	senderId	Proposed *
users	1 : N	invoices	clientId	Proposed *
service-requests	1 : N	reviews	requestId	Proposed *
users	1 : 1	theme-settings	tenantId (admin)	Proposed *
